

I strongly oppose RM-10869. The future of amateur radio does not depend on the use of CW. It makes no sense to me to keep CW as a license requirement since CW is becoming more obsolete with each passing year. This proposal will only hurt the hobby by punishing those who choose not to use this dying mode. I fully support ARRL's proposal of dropping CW as a license requirement. Using CW is a great option for those that wish to use it, but not needed. We need to move into modern times and stop living in the past!
